

Table of Contents

Biology and Life Sciences

- The supramolecular organization of Porphyra membranes and their participation in the biosynthesis and secretion of cellulose microfibrils 1
Ioannes Tsekos, Hans-Dieter Reiss and Arete Dimopoulou

Earth Sciences

- An integrated Ecosystem Theory 19
Sven Erik Jørgensen

Engineering and Materials Sciences

- On study of nonclassical problems of fracture and failure mechanics and related mechanisms 35
Alexander N. Guz

Mathematics and Computer Sciences

- Functional equation in the fundamental class of functions and the type of explicit formula 69
Muharem Avdispahić and Lejla Smajlović

- Membrane Computing: A General View 83
Oscar H. Ibarra and Gheorghe Păun

Physics

- Basic Problems of the Calibration of Measuring Systems Intended for Dynamic Measurements 103
Edward Layer

- Particule Physics and Medicine: a spin-off story 115
P. Lecoq

Social and Human Sciences

- Le cadastre des savoirs : Figures de connaissances et prises de réel Mapping knowledge: an epistemological challenge for human sciences 135
Claude Imbert
